

Hand Hygiene

MedBridge

Building Connections to the Future of Healthcare

Discuss

Soap and water vs hand sanitizer:
When is each the better choice?
What evidence would you collect to prove it?

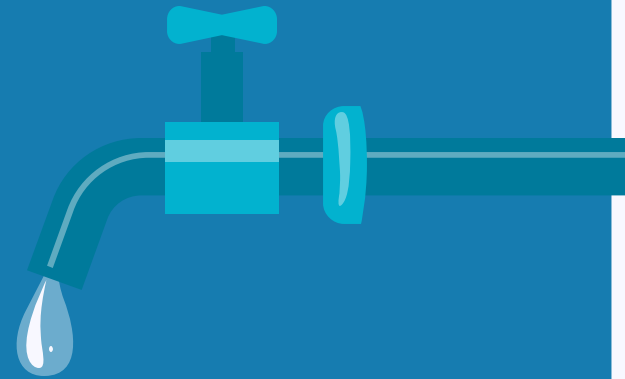

Discuss

Compare air-drying, shaking, and paper towels. Which likely leaves the least contamination, and why?

22,000,000

Days are missed per year because of a common cold

Why should I wash my hands?

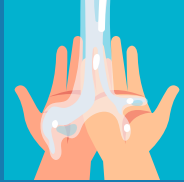

Hand hygiene has been proven as the single most effective way to prevent the spread of disease.

Why should I wash my hands?

Hand hygiene has been proven as the single most effective way to prevent the spread of disease.

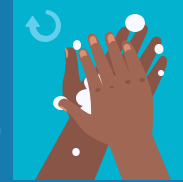

01

Wet your hands
with water

02

Apply enough soap
to your hands

03

Rub hands palm to
palm with soap

04

Lather the backs
of your hands

05

Scrub between
your fingers

06

Rub back on
opposite palms

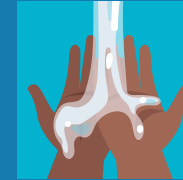

07

Clean thumbs with
enough soap

08

Wash your
fingernails

09

Rinse hands with
plenty of water

**Let's put your
handwashing
skills to the
test!**

Global Issue Problem Solving

Problem: In some regions, schools lack reliable water. Considering SDG 3 and SDG 6, propose a simple, culturally appropriate hand hygiene strategy for a low-resource school.

Task: Outline a 2-part plan that is realistic without constant running water. Define how you would measure success in 1 month.

30-second Proposal from each group

6 CLEAN WATER
AND SANITATION

3 GOOD HEALTH
AND WELL-BEING

Thanks!
